

Try it out for 30 days, and if you're not 100% satisfied with our system, return it for a refund!

You'll Have Peace of Mind

"Before I received the LifeLink system, I had slipped on my basement steps while moving some old books, said Jack M. of Wilmington, Delaware. I was stuck at the base of the steps for over six hours before my son found me. Now that I have LifeLink, it's a totally different feeling when you know someone will always be there in case something like that should ever happen again. Thanks LifeLink!"

I'm Sleeping Soundly Again!

"I worried about my mother living alone ever since Pop passed away. Until I found LifeLink, I would literally lose sleep wondering if Mom was Ok. Mom feels secure knowing that help is just a button press

away. I feel secure in knowing that she's doing well every minute of the day. The best part is that Mom doesn't have to subscribe to a service and worry about paying a monthly bill. I've been recommending the system to everyone I know!"

No Monthly Fee MEDICAL EMERGENCY ALERT SYSTEM

www.CallForAssistance.com

LifeLink is the premier medical emergency alert system available on the market today with no monthly fees. For an affordable one-time fee of \$199[†], LifeLink can help you regain your independence. For complete pricing info, see www.CallForAssistance.com/ordertoday

[†] Pricing is subject to change without notice.

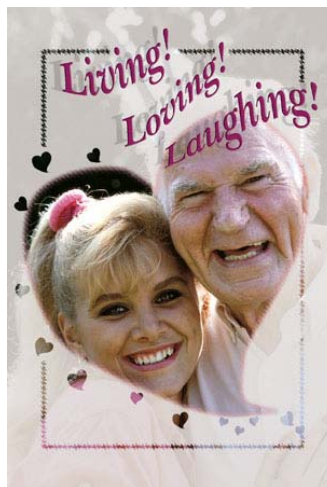

If you or a loved one lives alone, is elderly, disabled, or has health concerns, you shouldn't be without the LifeLink medical alert system. Gain the benefits of a corporate monitoring service without paying for one. With our system, the people that care for you - **family, neighbors, and friends** - receive the emergency call instead of an impersonal monitoring station. If you wish, the 911 emergency service can be programmed as well.

- ✓ Press a button on the emergency pendant and help is on the way!
- ✓ The system instantly calls up to four people that you've programmed during setup and plays your pre-recorded message that help is needed.
- ✓ The person called can listen in using a one-way microphone to determine the nature of the problem.
- ✓ The pendant is water-resistant so it can be worn in the shower or bath tub.

LifeLink works anywhere there is a phone line. In the event of an emergency, the system calls up to four phone numbers that you've programmed during the setup process - local numbers, long distance numbers, even 911. It runs on regular house power and uses a 9-volt battery as a backup in case of a power failure. When there is an emergency, the wireless pendant signals the Console to begin the emergency calling process. You'll now feel safe and secure knowing that emergency help from falls, heart attacks, strokes, or diabetic complications will quickly be on the way.

Q What happens if an answering machine answers the call?

A Once LifeLink calls an emergency number, it will wait for a zero keypress. If it doesn't receive the zero within 20 seconds (and, it won't since a machine is answering the call), it will hang up and automatically call the next number.

Q What is the range of the system?

A LifeLink will easily cover a home that up to 3500 square feet in size. This equates to a 100-foot horizontal and vertical diameter around the Console.

Q Does the system offer one-way or two-way communication?

A LifeLink uses a one-way microphone from the person in distress to the person called. The victim will know that someone is on the line because the siren (which begins sounding once the Emergency button is pressed) will go silent. Once the siren goes silent, the victim can begin describing their problem. With that said, you should view the listen-in capability as a secondary benefit, with the primary benefit being the fact that an emergency call was made and an emergency message was played.

Q What types of batteries are used?

A For the backup battery in the Console, a regular 9-volt battery is used (not included). The pendant uses a 3-volt CR2025 dime-sized battery. Both are available in your local hardware store, but we sell them on our website as well.

Q Do you supply a chain for the pendant?

A We used to supply a chain, but due to differing style preferences, allergies, etc. we now leave it up to our customers to decide what they'd like to use. Popular choices are a chain or a simple lanyard.

Q Do you offer a referral program?

A Yes. If you refer four (4) friends, we will write you a check for the price you paid for your system. We will repeat this for every set of four referrals you get.

Q What is the warranty on the system?

A LifeLink carries a 1-year warranty from the original date of purchase. We offer longer-term (2-year or 3-year) warranties if you are interested.
